

GREENHOUSE GAS VERIFICATION STATEMENT

61239828_BUI_DEME

DEME GROUP

VINÇOTTE nv

Jan Olieslagerslaan 35
1800 Vilvoorde, België

Organisation

DEME Group
Scheldedijk 30
2070 Zwijndrecht
Belgium

Period

01/01/2022 - 31/12/2022

Verification procedure

The verification was performed by Vinçotte in accordance with ISO14064-3 meeting the requirements of the ISO 14064-1.

Verified amount

102 644,8 ton CO₂

Declaration of independence

The verification was carried out by Vinçotte as an independent third party.

User of the GHG-assertion

Internal and external stakeholders, the general public

Level of assurance

Limited assurance

Objectives, scope and criteria:

Vinçotte performed on behalf of DEME an independent limited assurance of the anthropogenic greenhouse gas emissions between 01/01/2022 - 31/12/2022. The system boundaries for the greenhouse gas emissions are aligned with the financial consolidation scope.

The entities within the system boundaries are located in Belgium, The Netherlands and Luxemburg. Following activity lines are part of the system boundary:

- DEME Dredging
- DEME Infrastructure
- DEME Environmental
 - o DEME Environmental
 - o Ecoterras
 - o De Vries & Van De Wiel
- DEME Offshore

The activities and processes considered for the greenhouse gas inventory are buildings, transport of people (lease cars), machinery & equipment, vessels (RMPE excluded) & auxiliary floating equipment.

The greenhouse gas inventory includes scope 1 and scope 2

- Scope 1 emissions: direct energy consumption, lease cars
- Scope 2 emissions: electricity consumption and other indirect energy consumption (such as district heating);

The greenhouse gasses included were: CO₂.

In the context of the CO₂ performance ladder (niveau 5) the following emission sources were excluded from the carbon footprint: lubricants, air conditioning refrigerants, cutting & welding gasses, and scope 3 emissions. Data from the RMPE vessels that already is verified by IMO was excluded from the verification.

The data and information for the greenhouse gas inventory were based on documented information received from local responsables registered in Apprise and Sharepoint.

The verification consisted of an independent review of the primary data, the emission factors and the greenhouse gas calculations. The goal was to verify if the data and the results of the greenhouse gas calculations were complete, reliable, transparant accurate and free of material errors or emissions.

The verification was performed using a risk-based approach. For all other data a verification was performed taking into account materiality.

Conclusion

Vinçotte has verified the greenhouse gas assertion of DEME Group of 102 644,8 ton of CO₂ in 2022 to a level of limited assurance.

The greenhouse gas inventory was prepared according to the requirements of ISO 14064-1.

It is the conclusion of Vinçotte that the greenhouse gas emissions of DEME Group for the period 01/01/2022 - 31/12/2022 are fairly stated.

On behalf of Vinçotte,
20/11/2023
